EB GUIDE 6 GTF Training

EB GUIDE GTF from Elektrobit Automotive is the target runtime environment for the Human Machine Interfaces (HMIs) which are specified within EB GUIDE Studio. The training will enable you to run the entire toolchain from EB GUIDE Studio to the target hardware. Also you will learn how to use the new target related feature GtfScript and how to extend the GTF with your own functionality.

Content

- Architectural Overview of EB GUIDE GTF
- Exporting your EB GUIDE model
- Creating your first custom EB GUIDE GTF plugin
- Using the Dependency resolver mechanism
- Using the global API
- Model lifecycle
- Defining a script foreign function
